## High Precision Machinist

### Job Description:

Operate CNC and manually adjusted machinery, including lathes, mills, and horizontal grinders, in a hands-on capacity to manufacture a variety of complex parts for assembly into high performance electric motors, gearboxes, and other rotating machinery systems.

### Qualifications:

- High Level of aptitude related to manufacturing processes and machinery operation.
- Experience operating CNC machinery as well as manually adjusted machinery in some sort is mandatory.
- Experience running a metal lathe, milling machine, and a vertical or horizontal grinder is very desirable.
- Ability to read and interpret machining and manufacturing drawings.
- Ability to produce high precision machined parts in accordance with machine drawings to a high level of accuracy (+/- .0001”).
- Ability to inspect machined parts with mechanical inspection tools with a high level of accuracy (+/- .0001”).
- High attention to detail.
- Able to deliver results in both supervised and unsupervised environments.
- Good verbal and written communications skills in English.
- Experience using mechanical inspection tools (calipers, micrometers, gauge blocks, etc.) is desirable.

### Responsibilities:

- Machine high precision components in accordance with machining drawings in a timely manner.
- Operate various pieces of machinery including a metal lathe, a milling machine, and a horizontal grinder.
